

SF Series® Submersible Pump Lift Station Upgrade Kits

Gorman-Rupp SF Series® submersible pumps are designed and built using the latest technologies, resulting in a product that provides optimal performance. Eventually, all mechanical equipment requires maintenance or replacement, whether preventative or repair. To make the replacement of a Gorman-Rupp J Series installed pump easier for the customer, we have developed standard SF Series to

J Series pump, mechanical and electrical accessory replacement kits. Each kit comes complete with all the needed components to successfully replace the pump and required accessories, including the pump, guide shoe, moisture/thermal device, mounting hardware and installation drawing. To learn more about our Submersible Pump Lift Station Upgrade Kits and other Gorman-Rupp products, please contact any member of our sales team.
